

Mr. Diding Suhandy joined our laboratory

Mr. Diding Suhandy has joined our laboratory on January 12 from Lampung University, Indonesia. He is going to study on fruit grading using machine vision and other sensors after entering graduate school (Ph.D course, newly-created special course) since coming April. Since he graduated from Bogor Agricultural University (BS, IPB) and from Kochi University (MS) and is currently a lecturer at Lampung University. We expect his research will be a bridge between Indonesian universities and Japanese universities.
