

**Mr. Yamamoto, a researcher, BRAIN visiting our laboratory and giving a seminar**

Mr. Yamamoto, a researcher is visiting us on July 13 (Tue) to exchange our activities. He is also giving a seminar entitled “Development of a stationary robotic strawberry harvester” at our laboratory seminar from 14:45 at S177. I hope that all members, especially MVG, discuss with him about automation, robotics, and sensing systems. Although he needs to discuss with Kondo until 10:30 in the morning, I think he has a time to exchange activities with you between 11:00 and 14:45. Do not hesitate to talk to him because he graduated from this laboratory before (1997 from undergraduate school, and 1999 from grad school).
