

6 graduate students joined our laboratory

Mr. Shuqing Han (Ph.D), Qinghua Su (Ph.D), Slamet Widodo (Ph.D), Xiao Cheng (MS), Ms. Sultana Sabrina (MS) and Wang Tian (MS) joined our laboratory (See their own pages on this our homepage) since this October. I hope they settle down as soon as possible and start studying. They would be very much helped if all members frequently communicate with them for determining details of their own projects.
