

Drs. Diding Suhandy and Slamet Widodo are staying our laboratory

Drs. Didng Suhandy, Lampung University and Slamet Widodo, IPB, who graduated from our school two years ago, came to our laboratory on June 21 and are now staying up to June 28 for the Kyoto University satellite office at IPB and for the SPIRITS, Kyoto University Project. I expect we have more tight collaborations between Indonesian research institutes and our school. Communicate with them for our future collaboration and for your own research projects.
