

Mr. Harshana-san (Ph.D student) received
the JSAM Kansai Branch Best Student Presentation Award

Our graduate student, Harshana-san received the Best Student Presentation Award from JSAM Kansai Branch for his presentation on October 10 at Yanmar Musium, Nagahama, Shiga Prefecture. I wish all of our member try to get such awards by improvement with practices following him. His presentation was “Generic Detection of Strawberry in Complex Environments Using DeepLearning.” Congratulations!
