

### Shiokawa-san gave a training for leaders

Shiokawa-san, Executive Director, Japan, Xerox Corporation gave us a training how to solve the problems for managing research teams just after the special course of company men on July 5 as below photo.

The training content, which was already taken in some companies and showed its effectiveness, stimulated leaders and sub-leaders to enhance leadership and management skill not only for our teams but for their future. We discussed to take the training into our team management way.
