

President-sponsored party for international researchers

On November 29th evening, international researchers, Kyoto University were invited to a party held at the clock tower and exchanged activities beyond research fields. President Yamagiwa talked to us how to propel our researches introducing this year's Nobel Laureate (Physics), Prof. Osumi entered our graduate school of Science, Kyoto University in 1972 and deeply discussed on his research for two years. I wish you all study with extensive and deep knowledge (Not narrow and deep knowledge) on your research and propel your own research topics with our members.
