

Prof. Kondo received the Japan Prize of Agricultural Science

The Association of Japanese Agricultural Scientific Societies (AJASS) decided the top 7 researchers, 2017 in Japan as below web-site. The AJASS started giving contributors in this Agricultural Science Field this one of the oldest and toppest awards in agricultural fields, Japan Prize of Agricultural Science since 1925. One of the laureates is Prof. Naoshi Kondo and his achievement is “Sensing System Based Bio-Production Intelligent Robots.”

The AJASS consists of 49 associations related to Agriculture in Japan and many committee members voted the award-winning candidates' achievements presentations selected from each association's screenings procedure on January 20. In addition, Prof. Kondo received Yomiuri Agricultural Award. Both award ceremonies will be held with a symposium of award-winners' presentations and panel discussions on April 5, 2017 at University Tokyo.

We are delighted to hear the good news and wish our members make advanced researches with Academic Freedom and Self-Motivative Learning based on Bio-Sensing Engineering.
