

Mr. Shiokawa's Training

On May 22nd, Mr. Shiokawa, a representative of XEROX visited us and gave our members a training on enhancing problem-solving skills. This time the problem was "Why don't we learn other research team or group members' technologies?" A method "Work-out" was used and we discussed the reasons and how to solve higher effectively and rapidly. Since the method is one of the famous ones, we expect many members to learn the training method and improve their skills.
